THE DELIVERY SYSTEM Le-Vel is proud to present another innovation in nutritional supplementation and an exciting addition to the Thrive Plus product line—Sequential Gel Technology. The SGT delivery system was designed to immediately start absorbing as it enters and remains in the mouth and to be further absorbed as it enters the digestive tract and stomach. These Sequential steps are designed to improve the nutritional uptake and increase the absorption rate of our SGT formulas. With absorption playing such a crucial role in nutritional supplementation, Le-Vel is proud to offer Sequential Gel Technology to anyone aspiring for greater health and wellness.
